A Fusion circuit vs classical comparators, under each evaluation choice
MIMIC-CXR, each arm's own optimiser (n=447)
vs product-of-experts
vs gated head
vs logistic regression
MIMIC-CXR, matched optimiser (n=447)
vs product-of-experts
vs gated head
CheXpert, out-of-sample evidence (n=1,600)
vs product-of-experts
vs gated head
CheXpert, frozen transfer (n=4,800)
vs product-of-experts
vs logistic regression
Held-out patients, scored without selection (n=56,534)
matched optimiser, vs product-of-experts
matched optimiser, vs gated head
36-config search per arm, vs product-of-experts
